**Please provide details of any of these or other medical concerns to us: (If you need more room, write on back)**

### Diet & Feeding:

Cats can be very sensitive to diet changes. We request that you bring a supply of your cat's regular diet for their stay to minimize the chances that a change will upset their intestinal system. Otherwise, we will try to feed a comparable food from our supply if possible. Please specify your cat's dietary regimen below. Please list the **specific** food(s) you feed below and check the appropriate boxes.

### Personal Belongings:

We have an abundant supply of towels, blankets, bedding, and toys to keep your cat comfortable and happy. Personal items left may need to be washed and could be damaged or misplaced. Therefore, items with sentimental value should not be left. If you choose to leave personal items, please provide us a list of these items and any specific instructions you wish us to follow:

## Medical Requirements for Boarding

1. Examination by one of our veterinarians within the last 6 months/year subject to attending veterinarian's recommendations based on cats age and current health status.
2. Current vaccination status: **FVRCP** (Distemper/Upper Respiratory Viruses) and **RABIES** vaccinations are typically required every 3 years for most cats. **Feline Leukemia** vaccination is often required yearly for cats that go outdoors. Exact vaccine requirements are up to the discretion of The Cat Doctor Veterinary Staff.
3. Feline Leukemia (Felv) and Feline Aids (FIV) status must be known for every boarding cat. Cats that have never been tested will need to be at the owner's expense. Cats that are outdoors and have exposure to other cats should be tested yearly.
4. Flea Preventative/ Treatment must be applied to your cat in the last 30 days. Cats not current on an approved flea preventative will need to be treated at the owner's expense.

*If your cat is past due for any of the above items, please discuss this with our staff. Your cat will need to be examined and these items updated at your expense. If your cat has had allergic reactions to vaccines or other medications, or has a medical condition that precludes these requirements, we will need to discuss and make exemption arrangements.*

*Our primary goal is the reasonable protection of all our boarders, patients, and staff from unnecessary exposure to infectious diseases.*

*Cats that become ill, or do not eat for 36 hours will be examined by one of our veterinarians and may be treated at the owner's expense. If your cat becomes ill during their stay with us, our veterinary staff will need to examine your cat. Any treatments deemed necessary for the comfort of your cat will be implemented immediately at the owner's expense.*
